ASSEMBLY AND INSTALLATION INSTRUCTIONS

Rack Assembly

- 1) Place rack body on a firm surface.
- 2) Locate the hanging arms. Connect arms to the rack body by placing the ends under the appropriate cross bars as shown in the picture.
- 3) Measure and mark the location for the two ceiling screw hooks on the ceiling to hold rack hanging arms.
- 4) We recommend that you anchor your rack into the solid wood of ceiling joists or beams. Carefully measure the area where the rack is to be hung and install the ceiling screw hooks directly into the wood joists. If it is not convenient to hang your rack directly into wood joists you may use the included DRYWALL anchors enclosed with your rack. See Toggler® brand manufacturer recommendations for weight limits included in the instructions in the Toggler kit.
- 5) Using the 'S' hooks provided hang the rack by hooking one end of the 'S' hook over the arm and the other end over the ceiling screw hook that has been anchored securely into solid wood. Repeat process for other side.
- 6) If at any time you wish to reverse the rack, simply turn it over and repeat above. It is best to hang your pots on the crossbars to prevent sliding.

WARNING

It is important that your rack is assembled AND installed correctly. If the unit is assembled or used incorrectly, it could become unstable and collapse, possibly causing injury.
