

A-iPower Model SUA12000E

12,000 watt gasoline powered portable generator with electric start. The Power for Home and Work.

Powerful. Strong. Rugged. Reliable. Purpose-Built. The A-iPower SUA12000E generator delivers POWER, when you need it. This generator is powered by A-iPower's 459cc powerful and reliable engine. It provides 12,000 watts of starting power and 9,000 watts of running power. The size and power output make the SUA12000E the perfect generator for construction sites or as back-up power for your home during emergencies. Equipped with a keyless one-touch button for electric start, it allows an effortless startup of the generator. Its GFCI Protected Outlets provides added protection and safety under damp condition. The 1-1/4in heavy duty full frame provides added strength and protection for the generator.

High performance alternator is the key component of any generator. A-iPower SUA12000E is combined with an efficient, high output alternator which utilizes the same design and technology found in more expensive brand name products. With over 25 years of experience and reliability this design provides the greatest peak wattage for starting your motor-driven tools and appliances. Delivers power when you need it!

The generator has an easy to reach, ergonomically angled control panel which conveniently provides easy, user-friendly access and visibility to the panel. For your convenience, this unit has DC adapter plug for charging battery or use with USB adapter. The A-iPower generator can power up: lights, TV, refrigerator, pump, air conditioner, and fan all at the same time. It is capable of running 4 to 5 power tools. With a large 7 gallon heavy duty all steel construction fuel tank with built in fuel gauge, it provides an average run time of 9 hours at 50% load. The generator operates at 78dBA.

Powerful, Strong, Rugged, Reliable, Purpose-Built are the words for the A-iPower SUA12000E generator
A-iPower, Your Power Solution!

Features

- 1) 12,000 Starting Watts / 9,000 Running Watts
- 2) 60Hz, 120VAC / 240VAC, Single Phase
- 3) Powerful 459cc/16HP Engine. It's only single cylinder even for its big size. It delivers just POWER. Single cylinder, air-cooled, 4-stroke engine with electric start
- 4) High performance alternator provides greater peak wattage which allows motor driven appliances and tools to operate simultaneously.
- 5) Multiple Front Panel Outlets. Easy access, ergonomically angled compact control panel with multiple outlets with weather proof cover provides easy power connections and added protection from the environment and rugged working condition while conveniently providing easy, user-friendly access and visibility to the panel
- 6) Keyless one-touch push button provides an effortless start
- 7) Back-up recoil start. The oversized recoil and ergonomically designed big grip reduces your effort to pull the recoil easily to start the engine.
- 8) Cast iron sleeves for engine durability and extended run life
- 9) Intelligent Automatic Voltage Regulator (AVR) helps minimize voltage fluctuations and deliver consistent stable power under load
- 10) 7.0 gallon, large heavy duty all steel construction fuel tank provides up to 9 hours of run time at 50% load
- 11) High quality, bright red, powder coat finish is attractive yet rustproof
- 12) Seamless welding prevents leakage while curved edges and corners provided added safety
- 13) Large built-in easy to read fuel gauge
- 14) Large Stainless steel fuel cap
- 15) Large counter-sink around fuel filling port prevents fuel overflow while filling
- 16) Fuel tank breather hose located beneath tank, provides added protection from accidental damage
- 17) GFCI Protected Outlets provides added protection and safety under damp condition
- 18) Digital Hour meter for monitoring runtimes and scheduling of maintenance intervals
- 19) Push to reset circuit breakers provide overload protection
- 20) Weather proof cover provides protection for Circuit breakers and receptacles
- 21) Built-in DC Adapter Plug. Built for charge your battery or use with your USB adapter to charge your cellphone. DC charging cables included.
- 22) Low oil shut down automatically protect engine from potential damage
- 23) Dual element air filter protects engine while allowing extended service interval
- 24) The cord protective cover keeps all the wires concealed while providing protection and neat appearance
- 25) Rigid low tone muffler. Compact heavy duty reinforced steel muffler helps minimize the noise level. Equipped with USDA approved spark arrestor provides added safety.
- 26) 78dBA at 23ft sound rating
- 27) Neutral bonded to frame for added safety
- 28) 1.2in dia. rigid tubular steel frame with attractive silver grey powder coat finish
- 29) Built-in ergonomically designed handle provides easy transportation and folds down for compact storage
- 30) Effortless Move. Large 9.5in never-flat wheels designed for heavy duty loads and improved traction and mobility over rough terrain, ultimate on the job mobility
- 31) Easy to assemble and ready to go
- 32) Generator dimensions (with wheels): 27.8"(L) X 27.2"(W) X 25.4"(H)
- 33) Gross weight: 222LBS
- 34) Net weight: 216LBS
- 35) Recommended Oil: SAE 10W-30
- 36) Warranty: 2-Year Residential / 1-Year Commercial
- 37) EPA / 49 States. Not for sale in California
- 38) Four NEMA 120VAC 20A, GFCI protected outlets
- 39) One NEMA 120VAC 30A, L14-30R twist-lock outlet
- 40) One NEMA 120/240VAC 50A, 14-50R Industrial grade outlet
- 41) One 12VDC 8.3A adapter plug – can be used for recharging the battery or with USB adapter
- 42) 12V-14AH maintenance free battery included
- 43) Accessories included: Wheel kits, 1.0Qt start up engine oil, DC charging cables, Sparkplug socket, Owner's Manual
