Brackets and fixings

With our accessories you can create a unique storage solution to suit any space.

plan your space for storage

A storage system built around you

First things first

Measure up

It's really important to prepare your project by measuring up your space. This will ensure your storage systems fit perfectly and inform what you do.

What's next...

Now you have your measurements, you can start to plan your interior storage solution. Spacepro stanchion based systems can run from floor to ceiling or floor to wall depending on your space and needs.

The Aura system is simple to install and the accessories hook in and out of the stanchions making it really easy to arrange your storage how you need it.

The system gives you even more flexibility with the option of installation floor to ceiling or floor to wall. Its patented attachment system lets you position the accessories with precision, so you can use all your space and fit in those awkward-sized possessions.

Find out more

Planning your storage

Start with one column on the left of your space and then add on additional columns until you have filled your space. Most accessories are 24in or 36in but our adjustable hanger bars can be used to fill in that extra space.

24in Accessories

For 24in accessories
Width plus 2 Stanchions = **26.5in**

Max width: **26.5in***

36in Accessories

For 36in accessories
Width plus 2 Stanchions = **38.5in**

Max width: **38.5in***
